Kleer-cap® Domed labels

Kleer-cap® Domed labels are most often used as a finished logo or nameplate on a piece of equipment, frame or retail product. The doming is available in both flexible and rigid formulations. These domed labels are used by the Electronic, Retail, and Medical Manufacturing industries.

How We Do It.....

We start by printing an image on a polyester substrate and die cutting it to shape.

We then meter a set amount of clear epoxy on the label. The epoxy flows just to the edge, where surface tension stops the flow. Then we have a unique Kleer-cap® domed label.
